

#### **T-5. Laser Marksmanship Training System (LMTS)**

- a. LMTS is a portable BEAMHIT scaled RETS Range for training marksmanship tasks in a controlled environment without the need for live fire.
- b. The system also includes the Machine Gun Training System which may be used with M240B, M249, and M2 machine guns (utilizing blanks) and barrel mounted lasers.
- c. Units may request the use of LMTS through the Operations and Training Branch.
